

JHUN BART B. MACIRIN

IT Systems & Operations Specialist

[CERTIFICATES](#) | 09567159779 | jhunbartm@gmail.com | [LinkedIn: Jhun Bart Macirin](#) | [Behance Creative](#)

PROFESSIONAL SUMMARY

Results-driven IT and operations professional with hands-on experience in technical support, network setup and troubleshooting, systems analysis, CRM administration, workflow automation, QA-oriented process evaluation, and digital operations support. Experienced in using tools such as AgencyZoom, Jotform, Zapier, Meta Business Suite, Adobe Creative tools, Microsoft Excel, Power BI, Google Workspace, Canva, and core networking and troubleshooting environments. Combines teaching and field experience to document processes clearly, solve system issues efficiently, support users, improve workflows, and translate technical requirements into practical business solutions.

CORE EXPERTISE

- IT Technical Support
- Network Setup & Troubleshooting
- Systems Analysis
- User Support & Issue Resolution
- CRM Management
- Workflow Automation
- QA & Process Evaluation
- Business Operations Support
- SEO & Social Media Analytics
- CMS & Content Management
- Web Design Support
- Documentation & Training

TOOLS & PLATFORMS

CRM / Operations: AgencyZoom, Jotform, Zapier, Google Workspace, Microsoft Office, Email Campaign Tools; **Analytics / Reporting:** Microsoft Excel, Power BI, social media analytics dashboards; **Creative / Content:** Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro, Canva, Meta Business Suite; **Technical / IT:** Network configuration tools, IP addressing and connectivity troubleshooting, CMS tools, web design platforms.

PROJECTS

BuildSkill — Demand Forecasting and Handicraft Management System

Technologies: Laravel, Vue.js, MySQL, Inertia.js, XAMPP, phpMyAdmin, GitHub, Docker

- Developed a web-based demand forecasting and production management system for engineering innovation and handicraft products.
- Implemented CRUD operations, role-based access control, inventory tracking, customer transactions, and dashboard analytics using Laravel and Vue.js.
- Integrated database management and reporting features to monitor orders, inventory levels, and transaction summaries in real time.
- Utilized GitHub for version control and collaborative project management while applying structured SDLC and requirements analysis practices.
- Explored Docker containerization for portable development environments and streamlined deployment workflows.

Data Analytics

Technologies: Microsoft Excel, Power BI, Google Sheets

- Created interactive dashboards and reports for sales, inventory, and operational data analysis using Power BI and Excel datasets.
- Designed visualizations such as KPI summaries, trend analysis, pivot-based reports, and data-driven business insights.
- Performed data cleaning, transformation, and validation to improve reporting accuracy and usability for decision-making scenarios.

Network Simulation and Troubleshooting Laboratory Projects

Technologies: Cisco Packet Tracer, Wireshark, IP Configuration Tools

- Designed and configured simulated enterprise network environments including VLANs, IP addressing, routing, and device connectivity.

- Conducted packet analysis and troubleshooting exercises using Wireshark to identify traffic issues and connectivity problems.
- Developed networking laboratory activities focused on real-world troubleshooting, monitoring, and infrastructure planning.

CRM Workflow Automation and Administrative Support System

Technologies: AgencyZoom, Zapier, Jotform, Google Workspace

- Built workflow automations and CRM support processes for insurance-related operations to reduce repetitive administrative tasks.
- Automated form handling, notifications, and data synchronization using Zapier integrations.
- Maintained organized client records, policy data, and operational workflows while improving process efficiency and documentation consistency.

Social Media Content and Analytics Management

Technologies: Meta Business Suite, Canva, Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro, loomly

- Managed branded content creation, scheduling, and analytics reporting for multiple social media accounts.
- Designed promotional materials, visual assets, and marketing content aligned with client branding strategies.
- Analyzed engagement metrics and campaign performance data to support audience growth and content optimization.

PROFESSIONAL EXPERIENCE

IT Instructor | *University of Mindanao*

August 2024 - Present

- Deliver instruction in data analysis, project management, networking, systems analysis, and web development using Microsoft Excel, Power BI, Google Workspace, Cisco Packet Tracer, Wireshark, XAMPP, phpMyAdmin, Visual Studio Code, GitHub, HTML, CSS, JavaScript, PHP, Laravel, Java, and MySQL.
- Design laboratory activities, technical demonstrations, and project-based assessments covering network configuration, troubleshooting, dashboard reporting, database design, CRUD development, API fundamentals, and requirements analysis aligned with real-world business and IT workflows.
- Guide students in hands-on use of tools such as Cisco Packet Tracer for network simulation, Wireshark for traffic analysis, XAMPP and phpMyAdmin for local server and database setup, and VS Code with GitHub for web development, version control, and deployment-oriented practices.
- Develop rubrics, exams, documentation, and capstone-style project monitoring materials while strengthening students' skills in data interpretation, process improvement, quality checking, technical communication, and structured project execution.

Social Media Virtual Assistant | *EXE Media* | *Freelance*

February 2024 - July 2024

- Managed social media content workflows, campaign support, and account coordination for multiple clients while maintaining brand consistency across digital channels.
- Created visual content, mockups, and branded marketing materials using Adobe Creative tools and related design platforms.
- Monitored campaign performance and engagement metrics through Meta Business tools and analytics reports to support content optimization and decision-making.
- Helped improve online visibility, audience engagement, and execution of scheduled content strategies.

Virtual Administrative Assistant | *JMJ Insurance, Suwanee, GA, USA*

August 2023 - February 2024

- Administered CRM records, policy-related data, and client information using AgencyZoom, Jotform, and supporting operational tools with a strong focus on accuracy.
- Built and maintained workflow automations and system integrations using Zapier to reduce repetitive tasks and improve processing efficiency.

- Supported email campaign setup, record updates, and back-office administrative operations for insurance-related workflows.
- Improved operational consistency by organizing data, streamlining processes, and ensuring reliable documentation across multiple platforms.

Technical Support Intern | *Davao del Norte State College*

February 2023 - May 2023

- Resolved account access issues, hardware and software concerns, and common end-user technical problems through direct support and step-by-step troubleshooting.
- Assisted in network planning, installation, device setup, and IP address management to help maintain stable connectivity across campus locations.
- Configured and checked computer systems and network-related components to minimize conflicts and improve reliability.
- Provided in-person and email-based technical assistance while documenting issues and recommended fixes for users.

EDUCATION

Master in Information Technology

University of Mindanao | 2024 - Present

Bachelor of Science in Information Technology

Davao del Norte State College | 2019 - 2023
